

**1. Why CfC?**

What is your reasoning for approaching CfC? Which aspects of the organisation are you attracted to? Which features of our organisation were important in your decision to pursue CfC? Which aspects of the organisation would you like to learn more about?

**2. What is your priority?**

Are you looking to practice your current skill set, or to acquire new skills; is the internship a career development strategy or a career change strategy for you? Are there certain criteria required from your university?

**3. What type of work are you interested in?**

What type of specialisation (if any) you are interested in developing? Do you have a particular project in mind?

How flexible are you to the possibility that you might be offered a placement which may not fit exactly with your current study or previous work experience?

**4. Self-Reflection**

Consider your personal attributes, your theoretical knowledge, and your practical experience: what are your 'transferable' skills (i.e. which skills would you be bringing to the internship)?

Are you a person who needs structure and clear directions, or do you prefer flexible conditions with minimal supervision and maximum self-management opportunities?

**5. Timing of the Placement**

When would you be available to commence the internship, and for how long would you be available?
